Completer and skills-building students at Canada College were surveyed if they met one of the following criteria in 2016-2017, and did not enroll (or were minimally enrolled) in 2017-2018: earned a certificate of 6 or more units, earned a vocational degree, or earned 9+ CTE units. The survey was administered in early 2019 by e-mail, text message (SMS), and telephone. The survey addressed student perceptions of their CTE program, employment outcomes, and how their coursework and training relate to their current career. A total of 466 students were surveyed and 153 (33%) students responded: 35% by email, 54% by phone, and 11% by SMS.
What were the hourly wages of the students before training versus after training?

Before Training: $18.00
After Training: $26.00

What were the hourly wages of transfer students and non-transfer students—before training versus after training?

Transfer:
Before Training: $17.25
After Training: $21.25

Non-Transfer:
Before Training: $18.00
After Training: $28.60

Does the similarity between job and program of study influence wage gains?

Not Close: $0.50
Close: $6.00
Very Close: $9.50

More Key Results

$8.00 is the overall change in hourly wages after completing training—in dollars
44% is the overall change in hourly wages after completing training—in percentage gain
82% of respondents reported being employed for pay
31% of respondents reported transferring to another college or university
96% of respondents reported being very satisfied or satisfied with their training.

Conclusion

The results of the survey showed that completing CTE studies and training—whether or not a credential is earned, whether or not a student transfers—is related to positive employment outcomes. The preponderance of respondents are employed and are working in the same field as their studies or training. Notably, students realize a greater wage gain after completing their studies if they secure a job that is similar to their program of study.
