

CAREER & TECHNICAL EDUCATION EMPLOYMENT OUTCOMES SURVEY

2019 COLLEGE REPORT

City College of San Francisco

Completer and skills-building students at City College of San Francisco were surveyed if they met one of the following criteria in 2016-2017, and did not enroll (or were minimally enrolled) in 2017-2018: earned a certificate of 6 or more units, earned a vocational degree, or earned 9+ CTE units. The survey was administered in early 2019 by e-mail, text message (SMS), and telephone. The survey addressed student perceptions of their CTE program, employment outcomes, and how their coursework and training relate to their current career. A total of 2684 students were surveyed and 938 (35%) students responded: 34% by email, 53% by phone, and 14% by SMS.

How satisfied are students with the education and training they received?

How many students secured a job that is closely related to their program of study?

How many hours per week are employed students working?

How many months did it take for students to find a job?

What were the hourly wages of the students before training versus after training?

What is your current employment status?

What were the hourly wages of transfer students and non-transfer students—before training versus after training?

More Key Results

\$8.00 is the overall change in hourly wages after completing training—in dollars

40% is the overall change in hourly wages after completing training—in percentage gain

81% of respondents reported being employed for pay

32% of respondents reported transferring to another college or university

92% of respondents reported being very satisfied or satisfied with their training.

Does the similarity between job and program of study influence wage gains?

Conclusion

The results of the survey showed that completing CTE studies and training – whether or not a credential is earned, whether or not a student transfers – is related to positive employment outcomes. The preponderance of respondents are employed and are working in the same field as their studies or training. Notably, students realize a greater wage gain after completing their studies if they secure a job that is similar to their program of study.
