Career & Technical Education (CTE) Employment Outcomes Survey 2017 City College of San Francisco

Completer and skills-building students at City College of San Francisco were surveyed if they met one of the following criteria in 2014-2015, and did not enroll (or were minimally enrolled) in 2015-2016: earned a certificate of 6 or more units, earned a vocational degree, or earned 9+ CTE units. The survey was administered in early 2017 by e-mail, text message (SMS), and telephone. The survey addressed student perceptions of their CTE program, employment outcomes, and how their coursework and training relate to their current career. A total of 3,229 students were surveyed and 884 (27%) students responded: 87% by email, 3% by SMS, and 11% by phone.

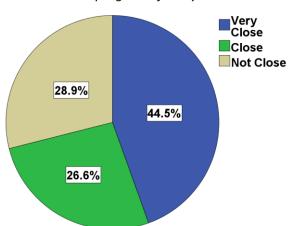

How satisfied are students with the education and training they received?

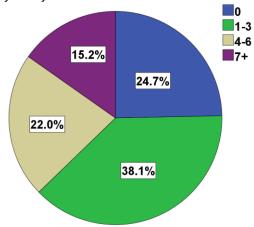

How many hours per week are employed students working?

How many students secured a job that is closely related to their program of study?

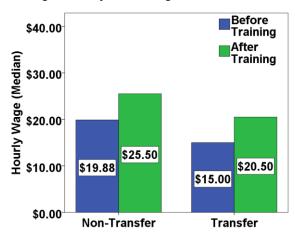

How many months did it take for students to find a job?

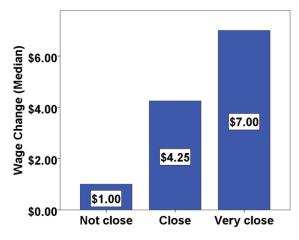

What were the hourly wages of the students before training versus after training?

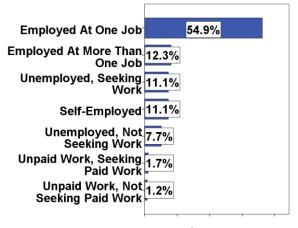

What were the hourly wages of transfer students and non-transfer students—before training versus after training?

Does the similarity between job and program of study influence wage gains?

What is your current employment status?

More Key Results

\$7.00 is the overall change in hourly wages after completing training—in dollars

39% is the overall change in hourly wages after completing training—in percentage gain

78% of respondents reported being employed for pay

25% of respondents reported transferring to another college or university

93% of respondents reported being very satisfied or satisfied with their training.

Conclusion

The results of the survey showed that completing CTE studies and training – whether or not a credential is earned, whether or not a student transfers – is related to positive employment outcomes. The preponderance of respondents are employed and are working in the same field as their studies or training. Notably, students realize a greater wage gain after completing their studies if they secure a job that is similar to their program of study.
