

## Career & Technical Education (CTE) Employment Outcomes Survey 2017 Folsom Lake College

Completer and skills-building students at Folsom Lake College were surveyed if they met one of the following criteria in 2014-2015, and did not enroll (or were minimally enrolled) in 2015-2016: earned a certificate of 6 or more units, earned a vocational degree, or earned 9+ CTE units. The survey was administered in early 2017 by e-mail, text message (SMS), and telephone. The survey addressed student perceptions of their CTE program, employment outcomes, and how their coursework and training relate to their current career. A total of 551 students were surveyed and 184 (33%) students responded: 32% by email, 13% by SMS, and 55% by phone.

*How satisfied are students with the education and training they received?*

*How many students secured a job that is closely related to their program of study?*

*How many hours per week are employed students working?*

*How many months did it take for students to find a job?*

What were the hourly wages of the students before training versus after training?

What were the hourly wages of transfer students and non-transfer students—before training versus after training?

Does the similarity between job and program of study influence wage gains?

What is your current employment status?

### More Key Results

**\$4.00** is the overall change in hourly wages after completing training—in dollars

**25%** is the overall change in hourly wages after completing training—in percentage gain

**82%** of respondents reported being employed for pay

**38%** of respondents reported transferring to another college or university

**94%** of respondents reported being very satisfied or satisfied with their training.

### Conclusion

The results of the survey showed that completing CTE studies and training – whether or not a credential is earned, whether or not a student transfers – is related to positive employment outcomes. The preponderance of respondents are employed and are working in the same field as their studies or training. Notably, students realize a greater wage gain after completing their studies if they secure a job that is similar to their program of study.
