## **San Diego College of Continuing Education**

Completer and skills-building students at San Diego College of Continuing Education were surveyed if they met one of the following criteria in 2019-2020, and did not enroll (or were minimally enrolled) in 2020-2021: earned a certificate of 6 or more units, earned a vocational degree, or earned 9+ CTE units (noncredit cohorts earned a noncredit vocational/CTE award or completed at least 48 CTE hours in that year). The survey was administered in 2022 by e-mail, text message (SMS), and telephone. The survey addressed student perceptions of their CTE program, employment outcomes, and how their coursework and training relate to their current career. A total of 4376 students were surveyed and 943 (22%) students responded: 29% by email, 46% by phone, 10% by SMS Link, and 14% by 2-way SMS.

How satisfied are students with the education and training they received?

How many hours per week are employed students working?

How many students secured a job that is closely related to their program of study?

How many months did it take for students to find a job?

What were the hourly wages of the students before training versus after training?

What were the hourly wages of transfer students and non-transfer students—before training

Does the similarity between job and program of study influence wage gains?

What is your current employment status?

## **More Key Results**

**\$8.00** is the overall change in hourly wages after completing training—in dollars

**36%** is the overall change in hourly wages after completing training—in percentage gain

**68%** of respondents reported being employed for pay

**7%** of respondents reported transferring to another college or university

**89%** of respondents reported being very satisfied or satisfied with their training.

## **Conclusion**

The results of the survey showed that completing CTE studies and training — whether or not a credential is earned, whether or not a student transfers — is related to positive employment outcomes. The preponderance of respondents are employed and are working in the same field as their studies or training. Notably, students realize a greater wage gain after completing their studies if they secure a job that is similar to their program of study.
